

## Device Attachment Rules

For best results, DSL modems, wireless modems, or other proprietary network gateways used on the Grand lake Telecommunications (GLT) broadband network should be provided by GLT. Customers may attach devices of their choosing to their modems, including wired or wireless routers, laptops, desktop computers, video game systems, televisions, or other network-enabled electronics equipment. However, **customers** are responsible for ensuring that their equipment does not harm GLT's network or impair the service of other customers. GLT is not responsible for the functionality or compatibility of any equipment provided by its customers. Customers are responsible for securing their own equipment to prevent unauthorized access to GLT's broadband network by third parties and will be held responsible for the actions of such third parties who gain unauthorized access through unsecured customer equipment.
